

# WORKFORCE TRAINING & TESTING

## Outcomes of Workforce Training

- Increase efficiency
- Improve quality
- Reduce rework
- Diversify welding skills & knowledge
- Our outcome is for you to see an immediate ROI after training

We will customize the training for your business after we take an assessment of the materials being welded, the welding processes, welding equipment, and current skill set.

## Welding Training & Testing

- GMAW (MIG), FCAW, GTAW (TIG), SMAW (STICK)
- Plate and Pipe
- Carbon Steel, Aluminum, Stainless Steel
- Welding Symbols
- Blueprint Reading
- Welder Certifications
- Welding Procedures Specification (WPS)
- Procedure Qualification Record (PQR)
- Pipe Fitting Fundamentals

## Choice of Training Locations

We can provide training at any three of our schools or at your facility. You choose what works best for you.

All tools, materials and space provided at LWT facilities ensure you are not cutting into your production resources.

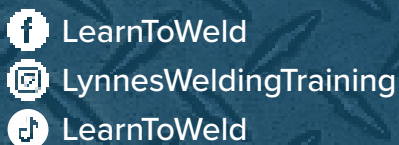

Training will be customized for your business after staff access the materials being welded, the welding processes, welding equipment and current skill set.

*"Dave Lynnes of Lynnes Welding Training sets the benchmark for manufacturing welding training. Dave and instructor Chad Erickson have delivered extensive onsite welding training at Rosenbauer America. The knowledge, skill, and instructional teaching expertise LWT training brought to employees at Rosenbauer America was well received, and helped us reach our goals of continuous skills improvement, process improvement and standardizing our new hire training. Dave and his team's commitment to customer service through the process of understanding our companies unique needs, processes and challenges in training allowed us to participate in designing a curriculum that suited our needs. I recommend LWT to any company in need of any service related to welding. Dave and his team have gone above and beyond to ensure our company was receiving value and quantifiable results from his training and industry expertise."*
